‹SpinFire 8.4 / 9.0 / 10 Floating License Setup Procedures

FlexLM Server

STEP 1 - Download the FlexLM Serever Code
http://iq.actify.com/iq/FloatingLicenseSupport/SFFloatingInst_840.exe

STEP 2 - FlexLM Installation Instructions
- **Stop** current **Actify Floating License Server** process if running
  - Via Control Panel->Administrative Tools->Services
  - Start the **Task Manager** and make sure all *lmgrd.exe* and *actifyd.exe* processes are terminated.
- **Install** on the desired server machine into the following location (Default);
  - C:\Program Files\Actify\Floating License Manager
- **Go to** C:\Program Files\Actify\Floating License Manager
- Copy the "**sfpflv2.dat**" file to this folder
- Run "**lmtools.exe**"
- Select the "**Config. Services**" Tab
- Make sure the Path to the *"lmgrd.exe*" and " *sfpflv2.dat*" files are correct
- Check "*Use Services*" and "*Start Server at Power Up*" at the bottom
- Select the "**Save Service**" button
- Select "**Start/Stop/Reread**" tab and select "**Start Server**"
- Select the "**ReRead License File**" button
- Select the "**Server Status**" tab and "*Perform Status Enquiry*"
- You should get back a listing of all your available licenses, similar to below;

```
--------
Status
--------
Flexible License Manager status on Wed 4/25/2012 08:56
[Detecting lmgrd processes...]
License server status: 27000@Server
    License file(s) on vassello-xp: C:\Program Files\Actify\Floating License
Manager\sfpflv2.dat:

Server: license server UP (MASTER) v9.2

Vendor daemon status (onServer):
  actifyd: UP v9.2
Feature usage info:
Users of CATIA:  (Total of 1 license issued;  Total of 0 licenses in use)
Users of CATIA_V2:  (Total of 1 license issued;  Total of 0 licenses in use)
Users of 3DView35-Core:  (Total of 1 license issued;  Total of 0 licenses in use)
```

FlexLm Server on Windows 2008 64-bit system

STEP 2 – 64 Bit FlexLM Installation Instructions

- Follow instructions from above
- Select "**Start/Stop/Reread**" tab and select "**Stop Server**"
- Unzip the contents of the attached "*Floating License Manager-x64.zip*" file into the "Floating License Manager" folder
- Start LMtools
- Select "**Start/Stop/Reread**" tab and select "**Start Server**"
- Select the "**Server Status**" tab and "*Perform Status Enquiry*"
- You should get back a listing of all your available licenses, similar to what is listed above.

SpinFire Client – Windows XP

STEP 3 - Client Activation

Automatic Activation
• Obtain the License file, license.al, from Actify
• Copy this file to the following location of each client;
o **SpinFire 8.4**: "C:\Documents and Settings\All Users\Application Data\Actify\SpinFire Professional"
o **SpinFire 9.0**: "C:\Documents and Settings\All Users\Application Data\Actify\SpinFire90"
o **SpinFire 10.0/10.1**: "C:\Documents and Settings\All Users\Application Data\Actify\SpinFire100"
o **SpinFire 10.2**: "C:\Documents and Settings\All Users\Application Data\Actify\SpinFire102"
• Start the SpinFire Application
• SpinFire will now obtain a license from the server, and automatically Activate when opened for the first time

SpinFire Client – VISTA\Windows 7

STEP 3 - Client Activation

 Automatic Activation
• Obtain the License file, license.al, from Actify
• Copy this file to the following location of each client;
o **SpinFire 8.4**: "C:\ProgramData\Actify\SpinFire Professional"
o **SpinFire 9.0**: "C:\ProgramData\Actify\SpinFire90"
o **SpinFire 10.0/10.1**: "C:\ProgramData\Actify\SpinFire100"
o **SpinFire 10.2**: "C:\ProgramData\Actify\SpinFire102"
• Start the SpinFire Application
• SpinFire will now obtain a license from the server, and automatically Activate when opened for the first time

NOTES:
• Make sure the **license.al** file has content and that the permissions allow normal users Read/execute access
• The "**sfpflv2.dat**" file will automatically be extracted from the license.al file and copied to the same folder as shown above
• If the license file is not placed correctly, or is invalid, SpinFire 9.0 will start and work in **Reader** mode with limited functionality
